Other Professional Experience

Senior Software Engineer

Systems Limited.

January 2007 – July 2007

I worked with Systems Limited as a senior software engineer. During my job at System limited I was leading a team comprised of 6 members to develop a delegation model utilizing WebMethods, which was the first implementation of this SOA based tool in Pakistan. This project was initiated by Lenders First Choice a top ranked mortgage company in the US.

My key responsibilities consist of the following activities;

- Research on WebMethods and its core components
- Develop a model for service integration
- Train the team members regarding the research outcomes
- Help team members to develop further code aligned with the process documentation
- Help Graphic Designing team to develop User Interfaces using WebMethods
- Create a bridge between Composite Application and IS Service team members

Senior Technology Consultant

Bearing Point Pakistan.

October 2005 – January 2007

I joined Bearing Point as a senior technology consultant. This was the time when the company just initiated the project for the development of a core banking system for a microfinance bank. I was appointed to develop ATM host interface and then major modules of the core banking solution which includes Loan Management, Product Definition, Vault Management, and Teller system. I lonely took the responsibility to develop the host interface which I certified with the prominent payment switch service provider in Pakistan prior to the development of the core banking solution.

My key responsibilities with BearingPoint comprised of the following activities;

- Design and Develop ATM Host Interface
- Integration testing of host interface with different vendors to compliance with the standard guidelines Integration of the host interface with core banking
- Development of different modules of core banking solution including loan management, product definition, vault management and teller system

Head Of IT

Baig Group of Industries.

July 2004 – October 2005

I was appointed as an independent consultant and then Head of IT at the Baig Group of Industries. At Baig Group I was managing the IT operations of Pak Denim Private Limited, Baig Spinning Mills Private Limited and Photo Magic Morocco. My major activity was to revamp a FoxPro 2.5 based ERP into a latest technology and to build a central system for the communication of different companies of the group.

My key responsibilities with Baig Group are described as follows;

- Support for the existing ERP system for Pak Denim
- Provide support for existing spinning system for Baig Spinning Mills
- Implementation of core platform for Photo Magic Morocco
- Take requirements from different department's managers and supervisors including Gate Inwards/Outwards, Store, Dyeing, Sizing, Finishing, Inspection, and Finance etc.
- Consult and finalize the requirements with different stakeholders
- Revamp existing EPR utilizing latest technologies and tools
- Provided tools for inter-communication within company's departments
- Provide extensive MIS reports for an overall analysis
